

Kahlua – Roughly 2 yrs old. Spayed. UTD with shots.

Pulled from a local shelter. Placed in a board and train program.

She entered the shelter as a puppy where she remained for a year and a half.

Overall assessment: Kahlua is a sweet girl with a fun side! She has an opportunist personality in the sense that if she believes you are not paying attention, she will follow her impulses, so a dog-saavy home is a must.

Current issues that need to be worked on: Kahlua loves to be loved, but she needs structure & management. She tends to try and micromanage her environment especially when energy is high. With training, she's learned to relax more but this will need continued training and management.

Positive attributes: She is sweet, playful, and loves going on adventures!

Animal sociability: She seems curious about other dogs, but her tendency to micromanage makes her difficult to place with other dogs without someone who is very dog saavy. She is not good with small animals - cats, rabbits, etc.

Ideal home: Kahlua would prosper in a home that takes is looking for an active companion that can also double as a couch buddy. She needs someone dedicated to continuing her training to ensure her success.

Quiet in crate? Yes she only whines when food is being prepped - she loves to eat :)

Housebreaking (if known)? Kahlua has a potty schedule & sticks to it beautifully

House manners? She spends a lot of time on place in the house to avoid her opportunistic ways, but she has been doing well in her trainers home
